Amendment to the Claims

1. (currently amended) A method of feeding a human infant, said method comprising administering to the infant a nutritionally sufficient amount of a liquid infant ~~nutritional~~ formula ~~for feeding human infants~~ comprising isolated soy protein wherein: (a) said isolated soy protein has a phytate content of 100 mg per liter of infant formula or less; and (b) said isolated soy protein has a degree of hydrolysis between 5 and 20%.

2. (currently amended) The ~~formula~~method of claim 1, wherein said isolated soy protein has a phytate content of 75 mg per liter or less.

3. (currently amended) The ~~formula~~method of claim 2, wherein said isolated soy protein has a phytate content of 60 mg per liter or less.

4. (currently amended) The ~~formula~~method of claim 1 wherein said isolated soy protein has a degree of hydrolysis between 5 to 19%.

5. (currently amended) The ~~formula~~method of claim 1, wherein said isolated soy protein has a degree of hydrolysis of between 5 to 15%.

6. (currently amended) The ~~formula~~method of claim 5, wherein said isolated soy protein has a degree of hydrolysis of between 5 to 10%.

7. (canceled)

8. (canceled)

9. (canceled)

10. (canceled)

11. (canceled)

12. (canceled)

13. (currently amended) ~~Use of isolated soy protein for the manufacture of a medicament~~ A method for the treatment of human infants with intolerance to cow milk-based feedings, the method comprising~~medicament being in the form of an infant formula for~~ feeding said infants~~,~~ a liquid infant formula comprising isolated soy protein wherein (a) said isolated soy protein has a phytate content of 100 mg or less per liter; and (b) said isolated soy protein has a degree of hydrolysis between 5 and 20%.

14. (canceled)

15. (canceled)

16. (new) The method of claim 13 wherein said isolated soy protein has a phytate content of 75 mg per liter or less.

17. (new) The method of claim 13 wherein said isolated soy protein has a phytate content of 60 mg per liter or less.

18. (new) The method of claim 13 wherein said isolated soy protein has a degree of hydrolysis between 5 to 19%.

19. (new) The method of claim 13 wherein said isolated soy protein has a degree of hydrolysis between 5 to 15%.

20. (new) The method of claim 13 wherein said isolated soy protein has a degree of hydrolysis between 5 to 10%.
